About Gary Karp

Gary is a national leader on Modern Disability Awareness as a writer, speaker, and trainer. He is the author of three definitive books on disability and has written extensively for disability media. In 2007 Gary Karp was inducted into the Spinal Cord Injury Hall of Fame as a Disability Educator.

His keynotes and workshops help organizations embrace and integrate the dramatic, historic changes in the modern disability experience. He breaks through prevailing—but obsolete—stereotypes, bringing workplace culture up to speed with this substantial, emerging, and untapped human potential.

In 1973, at the age of 18, Gary injured his spinal cord in a fall from a tree. With a graduate degree in architecture he had a career as a graphic designer and manager, and then, after a secondary injury, an ergonomics consultant. He is also an accomplished juggler.

Workplace Culture is operating on old and obsolete models of disability. Things have changed, and workplace culture must catch up with the truth of Modern Disability.
